

PRODUCT INFORMATION

Valvoline Performance Products – Tectyl

Version: TE076/01

Tectyl TPC Invisible

Premium water soluble, corrosion preventive concentrate.

Tectyl TPC Invisible is a corrosion preventive concentrate, developed for diluting in water. **Tectyl TPC Invisible** can be used as a temporary surface corrosion protection of industrial and automotive parts and equipment for indoor storage, without the need for removal afterwards. **Tectyl TPC Invisible** gives a clear, transparent and, in most cases, a non-tacky film.

Approvals/Performance levels

Tectyl TPC Invisible

Estimated Protection Period

Indoor: 6 months

Applications

Surface Preparation:

The maximum performance of Tectyl TPC Invisible can be achieved only when the metal surfaces to be protected are clean (non contaminated).

Application

Tectyl TPC Invisible is intended to be diluted in water. For best result, add 3% of Tectyl TPC Invisible to the water. Ideally de-mineralized or distilled water should be used. Normal tap water can be used as well with a higher percentage (up to 5%) of Tectyl TPC Invisible.

Slight mixing before usage everyday will allow a homogeneous mixture.

Tectyl TPC Invisible is not intended for use on machinery that comes in contact with food.

Features & Benefits

Excellent performance

Tectyl TPC Invisible gives excellent corrosion protection in high humid environments which makes it a very versatile corrosion preventative

User Efficiency

A 3% dilution in water gives already a strong corrosion protective layer, which allows metal parts to be stored in industrial indoor environments for 1-6 months without additional protection.

Invisible and no removal needed

The corrosion preventative layer is transparent and doesn't leave a waxy film which makes it very suitable for after-treatments without the necessary removal in most cases.

Typical properties

Typical property characteristics are based on current production. Whilst future production will conform to Tectyl specifications, variations in these characteristics may occur.

Tectyl TPC Invisible	
Appearance	Red-Brown liquid
Density @ 20°C [kg/ltr]	1,13
Kinematic Viscosity [cP]	60
Solid content [wt%]	64

This information only applies to products manufactured in the following location(s): Europe

Health & Safety

This product is not likely to present any significant health or safety hazards when properly used in the recommended application and good standards of personal hygiene are maintained. Reference is made to the Safety Data Sheet (SDS) which is available on request via your local sales office or via the internet <http://sds.valvoline.com>

Protect the environment

Comply with local regulations. Do not discharge into drains, soil or water.

Storage

Tectyl TPC Invisible should be stored at temperatures between 10-35 °C. **DO NOT FREEZE Tectyl TPC Invisible.** Under proper storage conditions Tectyl TPC Invisible is best before 24 months after production date.

Caution

Refer to the Safety Data Sheet for additional handling and first aid information.

Note

The addition of any product over or under this coating is not recommended. The use of additional coatings could result in chemical incompatibility, thus affecting the performance of this coating as stated in the Typical Properties section. If a primer, other than a Valvoline recommended product is required, written authorization must be obtained from Valvoline.
